

**REMARKS/ARGUMENTS**

The amendments to the specification merely correct errors in the Japanese specification. These errors are either apparent when read in light of the context of the specification or are typographical or clerical in nature. Accordingly, these amendments add no new matter.

In adherence with 37 C.F.R. §§1.821 to 1.825, this amendment is accompanied by a Sequence Listing in both a computer readable and written form (on paper).

The information contained in the computer readable disk was prepared through the use of the software program "PatentIn". The content of the sequence listing information recorded in computer readable form is identical to the written (on paper) sequence listing and contains no new matter.

Applicants respectfully request entry of this amendment
